

**Was there a neurological dysfunction?\***

YES    NO    UNK

Date of onset:\*

mm/dd/yyyy

ST=

Location of patient:\*

In hospital    Out of hospital    Unknown

Neurological dysfunction categories:\*

Causative or contributing factors to the neurological dysfunction AE (check all that apply):\*

- Patient not taking anticoagulation medication properly
- If patient receiving warfarin then, evidence of INR above target range
- If patient receiving warfarin then, evidence of INR below target range
- If patient receiving heparin then, evidence of PTT above target range
- If patient receiving heparin then, evidence of PTT below target range
- Complexities of Medical Management
- Device Related
- Unknown

Details of CNS event:\*

Location of CNS event:\*

Method of diagnosis of CNS event:\*

Description of clinical event:\*

Anticoagulant therapy at time of event (check all that apply):\*

- Warfarin
- Heparin
- Lovenox
- Aspirin
- Dipyridamole
- Clopidogrel (plavix)
- Argatroban
- Bivalirudin
- Fondaparinux
- Hirudin
- Lepirudin
- Ximelagatran
- None
- Other, specify

Specify:\*

Surgical intervention:\*

YES    NO    UNK

Drug intervention:\*

YES    NO    UNK

Treatment:\*

- Heparin
- Thrombolytics
- Anti-Seizure
- None of the above

Did this Neurological Dysfunction Adverse Event contribute to the patient's death:\*

YES    NO    UNK
